

# Control of Substances Hazardous to Health (COSHH) Awareness

## Aims

This half day course aims to equip delegates with the appropriate knowledge to make them aware of the hazards and risks associated with the control of substances in the workplace.

## Objectives

At the end of the programme you should be able to:

Outline legal requirements for control of hazardous substances (CoSHH, PPE, etc)

Describe the main types of occupational health risk

Describe the main forms of chemical attack on the body and the main routes of entry to absorbing areas

Outline control strategies for hazardous substances and biological agents

Describe the main types of equipment available for protection against health hazards and circumstances in which personal protective equipment is appropriate

## Programme summary

Introduction to workplace concerns
