

## National Diploma for Occupational Health and Safety Management Professionals

### Introduction:

The NEBOSH Diploma is *the* qualification for aspiring health and safety professionals, building directly on the foundation of knowledge provided by the NEBOSH National General Certificate. It is designed to provide learners with the knowledge and understanding required for undertaking a career as a health and safety professional and also provides a sound basis for progression to postgraduate study.

The qualification deliberately looks at general workplace issues so it can be applied in the many different sectors in which health and safety professionals may work. On completion of the qualification, learners will be able to:

- \* Understand how health and safety legislation is applied in the workplace and how possible enforcement actions could be taken for non-compliance and how they contribute to health and safety legal actions.
- \* Use different types of health and safety leadership approaches and be able to influence health and safety issues at all levels.
- \* Influence organisational health and safety workplace culture.
- \* Proactively manage health and safety, taking account of human failures and factors.
- \* Manage health and safety competence (both their own and that of their organisation).
- \* Use a range of hazard identification, risk management and loss causation techniques.
- \* Monitor health and safety performance.
- \* Develop their role as a health and safety professional, including understanding how it links with Corporate Social Responsibility.
- \* Effectively manage organisational change.
- \* Manage contractors and supply chains.
- \* Control a range of workplace health and wellbeing issues.
- \* Control a range of workplace safety issues.

### Assessment:

There are 3 assessments for the Diploma. The assessments will be in the following format:

- Unit ND1: assignment;
- Unit ND2: case study; and
- Unit ND3: case study.

Throughout the programme our trainers will help you to prepare for the examination by developing your question reading and answering technique. This attention to the finer detail of the examination ensures that most of our candidates pass first time.

### Important:

Learners already enrolled onto the November 2015 specification cannot be transferred to the new specification. As the syllabus content and assessment formats have changed, it will not be possible to transfer learners between specifications. If a learner wishes to transfer, they must enrol onto the new specification and take all unit assessments for this specification.

### KeyOstas Notes:

Everyone attending the programme gets a comprehensive reference manual covering, in depth, all of the subjects included in the training programme. These notes are acclaimed by all who read them and prove to be a valuable source of guidance long after your training is complete..

- \* This course will require an element of private study.

### Why choose KeyOstas?

We care about the products we deliver; we care about our delegates; and we care about our profession and its impact upon our clients' effectiveness.

## National Diploma for Occupational Health and Safety Management Professionals

We anticipate that it will take you around 60 hours to complete the ND1 assignment and 40 hours each for the ND2 and ND3 case studies. The time-period given for you to complete each assessment reflects this:

- Unit ND1: 6 weeks (30 working days) : 'Know' - workplace health and safety principles  
Assignment - workplace based tasks together with simulations  
and reflective statements and a research topic
- Unit ND2: 4 weeks (20 working days) : 'Do' - controlling workplace health issues.  
Scenario-based case study
- Unit ND3: 4 weeks (20 working days) : 'Do' - controlling workplace safety issues.  
Scenario-based case study
