

Course

To provide updated information and areas of responsibility for health, safety and environment concentrating on risks specifically found in the Mineral Extraction and Products Industry

To understand the implications of hazard recognition/risk assessment and the effects on individuals and the employer.
To demonstrate how individual behaviour can help reduce accidents.

Objectives

On completion of the course delegates will have the knowledge to:

- Demonstrate their understanding of the subjects by successfully completing each module assessment paper
- Appreciate how they personally can influence good standards within health safety & environment.
- Understand the value of risk assessment and have the knowledge to recognise when change to a generic assessment is required
- Understand the common hazards associated with working in this sector
